Flexible Auger for Auto Feed System

Auger For Pipe	Item No.	AXB	DX P
Diameter 45, thickness 0-3.0mm	1	3.8×8	36×50
	2	4.5×8	36×50
Diameter 50, thickness 0-3.0mm	3	3.8×8	38×50
	4	4.5×8	38×50
Diameter 63, thickness 0-4.0mm	5	4×10	43×50
	6	4×10	46×50
	7	4×12	43×50
	8	4×12	46×50
	9	4×12	50×70
	10	4×12	55×55
Diameter 75, thickness 0-4.0mm	11	4×12	60×55
	12	5×12	60×55
	13	4×12	63×55
	14	5×12	63×55
Diameter 90, thickness 0-4.0mm	15	4×12	70×60
	16	5×12	70×60
	17	4×12	75×60
	18	5×12	75×60
	19	5×14	70×60
	20	4×16	70×60
	21	5×14	75×60
	22	5×16	75×65
	23	5×12	80×60
Diameter 95, thickness 0-4.0mm	24	5×14	80×60
	25	4×16	80×60
	26	5×16	80×60
	27	5×12	85×60
Diameter 100, thickness 0-4.0mm	28	5×14	85×60
	29	5×16	85×60
	30	5×12	90×70
Diameter 120, thickness 0-4.0mm	31	5×14	90×70
	32	5×16	90×70
	33	5×14	95×60
	34	5×16	95×60
	35	5×14	100×70
Diameter 130, thickness 0-4.0mm	36	5×16	100×70
	37	6.3×16	100×70
	38	5×16	105×70
Diameter 140 , thickness0-4.0mm	39	6.3×16	128×80
Diameter 160 , thickness 0-4.0mm	40	6.3×16	140×80

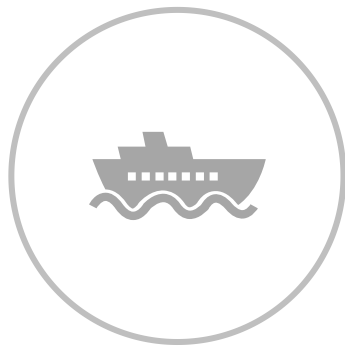

How to work

By driving the motor to rotate the auger, the feed is driven to achieve the effect of automatic feed delivery.

Auto Feeding System

Auger connected with feed tower, conveying pipe and motor to transmit feed. When the automatic feed line is turned on, the motor is started, the auger in the conveying pipe is rotated, and the feed is conveyed to the end of the feed line. When the feed line sensor senses that the last hopper is full of feed, it will immediately stop running.

Advantage

The automatic feeding system reduces the labor intensity and saves breeding costs.

A new type of agricultural and industrial machinery that transports particulate materials pneumatically.

It is suitable for the bulk transport of small particles such as grain and plastics.

Flexible Auger for Grain suction machine

It can be used to transport materials horizontally, inclinedly, and vertically using the layout of the pipe. ,

It can complete the conveying task independently.
